Ring size is very important before we do a quote because we do pricing per gram of metal used. Come in and get your ring size confirmed before the manufacturing begins. If you are unable to come in and would like the ring to be a surprise (especially the engagement rings) we can work from a ring she has that fits, her finger or if you use the ring sizing chart. We will unfortunately not take any responsibility for rings that do not fit if we have not done the sizing in studio, but we would gladly resize accordingly.
